Education

Georgia Institute of Technology — Atlanta, GA
Master of Science, Computer Science — *Expected Dec 2027*

University of Texas at Dallas — Richardson, TX
Bachelor of Science, Computer Science — *Completed May 2025*

Experience

AMD | *Python, HTML, PostgreSQL, Figma, Plotly, CSS, Jira, FastAPI, Linux, Ubuntu, RHEL, Unix* — Austin, TX
Software Developer — *June 2025 - May 2026*

- Built a **Python/FastAPI, PostgreSQL, Pandas,** and **Plotly** inventory system centralizing **10,000+ DIMM, CPU,** and system records, **cutting hardware lookup time by ~40%.**
- **Automated data cleaning,** enrichment, and **real-time dashboards, reducing manual inventory updates by ~30%** while improving component visibility and data consistency.
- Applied **Agile methodology** with **unit, regression**, and **integration testing** to validate **APIs, SQL updates,** dashboards, and **Jira provisioning workflows, improving provisioning efficiency by ~25%.**

Tomorrow's Leaders Today | *Next.js, Node.js, Tailwind CSS, SQLite, Google OAuth 2.0, Figma, Prisma* — Frisco, TX
Software Development Intern — *Jan - May 2025*

- Constructed a **full-stack** Grant/Funding Application Manager with **Next.js, Node.js, SQLite,** and **Prisma** to aggregate funding opportunities through **automated web scraping.**
- Integrated **Transformers.js** to generate tailored LOI verbiage and grant responses while designing a **responsive UI** with **Tailwind CSS, Headless UI,** and **Figma.**

University of Texas at Dallas | *Python, Scikit-Learn, Pandas, NumPy, Beautiful Soup* — Richardson, TX
Undergraduate Research Intern — *May - Aug 2024*

- Developed a **Python/Beautiful Soup web scraper** that **processed 500+ websites** into a **structured dataset** for training an **Artificial Neural Network** on underrepresented dialect translation.
- Defined **dialect eligibility criteria**, coordinated research strategy with faculty, and supported the Hafez Effort's **AI-driven translation** initiative.

Projects

ApplyIQ | *Java, SpringBoot, React.js, TypeScript, PostgreSQL, Spring Security, Docker, Claude API, AWS S3*

- Building a **full-stack Java web application** with **Spring Boot, React.js, TypeScript,** and **PostgreSQL** that enables users to track job applications, manage statuses, upload resumes, and view **AI-generated** resume-to-job **match scores** through an **interactive dashboard.**
- Developing **secure REST APIs** with **Spring Boot, Spring Data JPA, Spring Security,** and **JWT authentication** while integrating **AI-powered features** for skill extraction, prompt engineering, fit scoring, interview preparation, and follow-up recommendations.

Tomorrow's Weather | *Python, Scikit-Learn, Flask, React.js, HTML, CSS, AWS S3, DynamoDB, Pandas, NumPy*

- Created a **Python-based** senior capstone **web application** with **Flask, React.js**, and **Scikit-Learn** that combines **Random Forest, Linear Regression,** and **XGBoost models** to generate long-range climate forecasts using global historical data.
- Deployed the **full-stack solution** on **AWS** using **S3** for media storage and **DynamoDB** for dataset management, supporting scalable data access and **real-time weather updates** from **automated Python scripts.**

Fintasy | *Vue.js, Python, Vite.js, PostgreSQL, Docker, FastAPI, Alpaca, Nginx, Pydantic, Uvicorn, API*

- Led the design and implementation of a **full-stack paper trading simulation website** with **Vue.js**, achieving a **98% accuracy** in **real-world market data** through virtual tournaments, boosting user engagement by **25%.**
- Engineered a robust **Python backend** coupled with a **PostgreSQL database** to manage stock and user information, enhancing **data retrieval efficiency by 30%** through optimized **caching** strategies.

Technical Skills

Languages: Python, Java, JavaScript, R, TypeScript, SQL, C++, C#, C, HTML/CSS

Frameworks: Spring Boot, FastAPI, Flask, React.js, Next.js, Scikit-Learn, PyTorch, TensorFlow, Pandas, NumPy

Technologies: PostgreSQL, DynamoDB, AWS S3, Docker, Git, GitHub, Linux, Jira, Prisma, OAuth 2.0
